### **Didier Roguet**

*I am a scientific curator at the Botanical Conservatory and Gardens of the City of Geneva (CJBG), a well-known institution in the botanical world.*

*I'm an ethnobotanist, in charge for the CJBG of the useful plants collections (herbaria and living plants) and of all the cooperation programs of the CJBG, mainly in West Africa (Senegal, Ivory Coast, and Benin) and South America (Paraguay, Brazil).*

*I love photography and I like to demonstrate that you can provide nice pictures with a mobile phone, in particular with the Samsung ones. I shoot professionally only with the S21ultra.*

*I like sending pictures to WSC as a way of supporting the sharing of scientific images with the scientific community, here and in the Global South.*

*I love to promote the mediation and educational qualities of these images, in particular in the Global South, where we use them almost every day with our local colleagues in charge of our cooperation projects, through interpretation, communication/information, and environmental education (EE) programs for a better natural and cultural biodiversity conservation.*
