

Luis Scarabino

My name is Luis Scarabino. I am a sales representative in the pharmaceutical industry and a photographer by passion. Since I interrupted my medical studies, my interest in nature and everything related to the natural sciences has continued to accompany me.

Over time I have discovered my special interest in photographing animals in their habitat; so, as far as my profession and my occupations allow me, I travel to regions and places where I can observe and take pictures of them without disturbing their habits.

I filmed the griffon vultures during an excursion to the Rémuzat region in France, where there is an important colony. The photo of the Common Coot (Fulica atra) in its nest with egg and chick was taken at the Neuenhof dam in the canton of Aargau.

This is my second participation in the competition. The Wiki Science Competition and Wikimedia platforms are in general of great importance for easier access to educational and scientifically interesting material. I'm very happy and proud to be part of it.
