### **Marian Duven**

*I am ex-lawyer who reinvented herself into an award-winning photographer and a coach. My approach leads me to earn the title of top 5 wedding photographer worldwide in 2015. I am also a queen manifester, public speaker, energy worker and a coach, specialized in the topics of Creativity, Resilience and Joy. My work has been published several times in Elle, Vogue, Vanity Fair and various other prestigious magazines and blogs. I use photography as a tool - among much others - in order to transform the lives of my clients. I also love planning life-changing retreats and delivering workshops and conferences.*

*My winning set is titled "a day at IDSIA", is an internationally known center in the field of artificial intelligence. It was shot in the large open space of the East Campus of Viganello,*

*where 67 SUPSI researchers work, while their USI colleagues are located in another building of the same campus. The reportage depicts the everyday research activities, but it also highlights the "liberating" moments at IDSIA, such as the table football challenges, or the rarefied, silent atmosphere of a good part of the open space.*
